

SUDHARSHAN R.

Computer Science Undergraduate

+94 76 480 5870 || r.sudhan2016@gmail.com || No.79/10,W.A.Silva Mawatha Colombo-06

ABOUT ME

Computer science student with a passion for full stack development, seeking an internship to gain experience and contribute to innovative solutions. Proven ability to learn new technologies quickly and apply them to real-world projects. Eager to collaborate with a talented team and make a positive impact.

PROJECTS

University academic progression predictor

Python

- Developed a program that will display the outcomes of the university students based on their credits using Python.

Burger Shop Order Queue System

Java

- Developed a program to add, remove, show, create and save the order & customer details using Java.

Shopping Cart Management System

HTML,CSS,Javascript

- created a web application for Sports with a presentation page, a buy product page, additional content pages, and a page editor using HTML, CSS, and JavaScript

UNI Sports

Java, Java Swing

- The shopping cart management system uses console commands and facilitates purchases through a simple graphical interface, ensuring smooth handling of shopping cart tasks and enhancing user satisfaction with a seamless experience.

Explora: Software Development Group Project

React

- The Explora application aims to provide the functionalities of planning, organising and documenting the trip all in one application. Explora has several features like the ability to create a trip, tracking expenses on the go, documenting the trip and the ability to manage multiple trips at the same time.
